Fully customizable, using the optional Customization Tool Kit	✓
Built-in, standards-based connector to PeopleSoft, SAP and Oracle Business Suite	✓
Can be custom integrated with HR, ERP, CRM & other enterprise systems	✓
Support for multiple, distributed content servers	✓

## System Requirements and Specifications

<b>Client</b>	<b>Hardware/ Software</b>	Any computer running Internet Explorer 4.0 or above (IE 5.0 or above recommended), Netscape 6.2 or above and all versions of Firefox. Client requirements are identical for both the end-user interface and administration tools. All administration tools are presented through a Web interface. No downloads or players are necessary to run or administer VCampus EKP on an end-user's computer.
<b>Server for Behind- the-Firewall Installations</b>	<b>Operating System</b>	VCampus EKP is 100 percent Java-based and runs on any system with Java Virtual Machine 1.3 or above, Windows 2003, 2000 or NT 4.0 (Service Pack 4 or above), Solaris 7 or above, HP-UX 11 or above, Red Hat Linux - Version 6.1 or above and Mac OS X (all versions).
	<b>Hardware</b>	Single CPU Pentium (or equivalent) 1GHz or higher. Minimum system memory: 512MB. Minimum database size: 500MB. VCampus EKP runs on servers with multiple CPUs, including SMP Unix systems. VCampus EKP also supports multiple physical systems in clustered, load balanced configurations.
	<b>Database</b>	Sybase Adaptive Server Enterprise 12.x, Oracle 8i/9i/10g or Microsoft SQL Server 2000.
	<b>Web and Application Server</b>	VCampus EKP is bundled with and will install configured for Apache/Tomcat. VCampus EKP will also run on IIS with JRun, BEA, Oracle Application Server, WebSphere, EAServer or any other servlet engine that supports servlet specification 2.3 or above
<b>Standards</b>		VCampus EKP uses a 100 percent Java architecture and conforms to the J2EE standard. It is able to run on any hardware platform that supports the JVM 1.2 and also supports all existing operating systems (Windows, UNIX, Mac, Linux). It interfaces with legacy systems, CRM, ERP and HR systems.
<b>E-mail</b>		VCampus EKP can communicate with any SMTP e-mail server such as Microsoft Exchange. To enable communication with a mail server all you need to do is specify the name of server (e.g., smtp.your-company.com) in the ekp.properties configuration file and restart. Your e-mail server will need to be told to accept e-mail from VCampus EKP.
